<b>CLEANING</b>	<p><b>Automatic Washdown System</b> - Automated waterfall washdown system, rinses the booth automatically after each session or customize your washdown schedule to match your business.</p> <p><b>Optional Booth Cleaner BiB</b> - 1.4 gallon bag-in-box containing a special cleaner solution that is injected into the washdown line on your schedule to keep the booth clean and fresh regardless of your tanning volume.</p>	<p><b>Automatic Washdown System</b> - Automated waterfall type wash-down system, rinses booth automatically after each session.</p> <p><b>Drainage</b> - A floor draining system removes excess water and solution after the misting and wash-down processes.</p> <p><b>Self-Cleaning Extraction Fan System</b> - With a high-volume, self-cleaning extraction fan system your clients will experience an overspray-free environment, and you'll experience hands-free maintenance. Plus the exhaust filter cleans itself after every session!</p>
<b>MECHANICS</b>	The Mystic booth uses a single electrostatic spray nozzle to provide a fast, uniform spray that can wrap evenly around otherwise shadowed surfaces. Two rotational motors provide vertical and horizontal motion to the fixed spray nozzle. An air compressor is used to set up a vacuum pump effect that draws the custom mixed solution from a single session cup to provide two fine mist passes for full coverage.	The VersaSpa uses a linear translation stage to drive the movement of the 3 spray nozzles over the full height of the tanner. A piston pump supplies metered doses of solution to an air turbine that creates the large droplet spray that provides a quick, even tan over 4 separate passes.
<b>ELECTRICAL CONNECTION</b>	<p><b>Wall Outlet</b> - NEMA 6-20</p> <p><b>Power Requirements</b> - System: 208-240 VAC Single Phase, 20 AMP</p>	<p><b>Wall Outlet</b> - NEMA L630</p> <p><b>Power Requirements</b> - System: 208-240 VAC Single Phase, 30 AMP</p>
