

TAN + RAPID SOLUTION

Frequently Asked Questions

What is Tan + Rapid?

Tan + Rapid gives clients the flexibility to choose between a traditional gradual tan or a rapid Tan, allowing them to rinse in as little as 1 hour while still achieving beautiful, natural-looking color.

How are rapid tans different from traditional spray tans?

Gradual tans require clients to wait at least 6 hours before showering.

With Mystic's rapid tan option, clients choose their rinse time based on their desired shade:

Rinse Time	Expected Color
1 Hour	Light Bronze
2 Hours	Medium Bronze
3 Hours	Dark Bronze

Color continues developing over the next 24–48 hours.

Will Rapid Tan last as long?

Yes. Tan + Rapid is formulated with naturally derived DHA and Erythrulose to deliver beautiful, long-lasting color when proper aftercare is followed.

Will the color continue to develop after rinsing?

Yes. Even after rinsing, the tan continues to develop for 24–48 hours, resulting in a natural-looking bronze finish.

Can clients customize their rapid tan?

Absolutely. Clients can personalize every session with:

- ✓ Bronzers
 - ✓ Scents
 - ✓ Skincare Treatments
-

How should clients care for their tan?

- Moisturize daily
- Avoid exfoliating until ready to remove the tan
- Wear loose, dark clothing immediately after spraying
- Avoid swimming or excessive sweating until after the first rinse

Does Rapid Tan smell like a spray tan?

Tan + Rapid features D-Odor 200 Technology, which dramatically reduces the traditional spray tan odor.

Will my skin feel dry afterward?

No. Tan + Rapid includes Tri-Hydration Technology to help leave skin feeling hydrated, soft, and comfortable.

What ingredients make Tan + Rapid different?

- Naturally derived DHA
 - Naturally derived Erythrulose
 - Tri-Hydration Technology
 - D-Odor 200 Technology
 - Cruelty-free
 - Vegan
 - Paraben-free
 - Non-comedogenic
-

Do I still need to purchase a Tan Solution and an Activate Solution?

No. Tan + Rapid replaces the need for a separate Tan Solution. You'll still need Activate Solution, but Tan + Rapid delivers both traditional gradual tans and Rapid Tans from a single bag-in-box (BiB), simplifying inventory while giving clients more flexibility.

Why is Tan + Rapid priced higher than Tan Solution?

Tan + Rapid gives you two services in one product—traditional gradual tans and premium Rapid Tans.

- Gradual Tan: Approximately \$2.08 per session (same as Tan Solution)
- Rapid Tan: Approximately \$3.75 per session

Because Rapid Tans offer clients the convenience of rinsing in as little as 1 hour, many salons position them as a premium service, helping offset the higher cost per session and increasing revenue potential.

What is the recommended lower drawer configuration?

To maximize flexibility and simplify operation, we recommend stocking the lower drawer with:

- Tan + Rapid Solution
- Activate Solution
- WellFit Base Solution (for 2025 model booths and newer) or Moisturizer Solution
- Booth Cleaner Solution

This configuration supports both gradual and Rapid Tans, skincare treatments, and automatic booth cleaning.
